

Vision Metering's impressive watt-hour meter lamps make excellent achievement and retirement gifts for employees as well as excellent conversation pieces for your office or lobby.

Custom wood bases are designed to accommodate brass plates that you can have engraved with names and dates to fit your particular special occasion.

The meters used are refurbished Westinghouse CA or GE I-30A dating from 1935-1954 and are fully functional to record actual energy usage. The speed of the disk is dependent on the wattage bulb used.

All meter lamps come with a 30 day warranty.
